

# MTB COMPACTOR

## HYDRAULIC ROTATING SYSTEM COMPACTORS

**CMP hydraulic compactors** are attached to machines that house hydraulic power units mini excavators, backhoe loaders, excavators, etc. **Hydraulic compactor** compacts with high-frequency impact power. This vibration force is used to compact soil, granular material, piles, and driving all kinds of wood and steel posts. Also, impact buffers were added to protect the vibration buffers from impacts and give them a longer lifetime during compacting and post-driving operations. **The rotation function provides 360 degrees rotation of the compactor.**

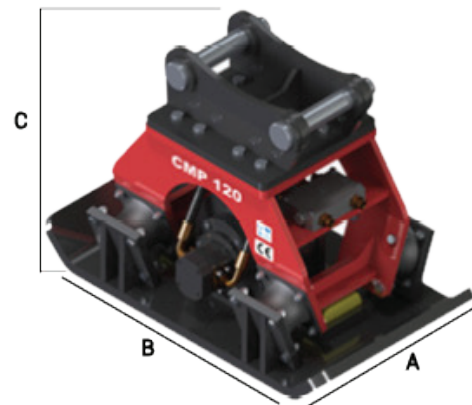

## CMP 70R

**CMP 70R** compactor in the **Hydraulic Compactor series** is manufactured to be 971 kg for the construction equipment in the range of 10-25 tons. They produce 6000 kg force with 2000 rpm impact frequency and 840x1050 mm bottom plate dimensions.
