FABO[®]

Crushing Screening Plants

FABO Stationary Crushing Plants

FABO, which sells crushing, screening and washing facilities to 7 continents, produces the most powerful crushers and sieves in the market. With its low maintenance costs, innovative designs and 17 years of experience, it offers unique solutions to its customers.

Stationary crushing plants have advanced equipment that provides high efficiency for mines, quarries and construction projects. Our crusher plants with different capacities are ideal for solutions suitable for every project.

Stationary crushing plants can be used for aggregate production in various sizes, for crushing hard mines and ores. To maximize your profits and improve your business volume, like companies around the world, choose FABO crushing, screening and washing facilities.

Our stationary solutions: Stationary Stone Crushing and Screening Plants

- Vibrating Bunkers
- Jaw Crushers
- Primary Impact Crushers
- Tertiary Crushers
- Vertical Shaft Crushers
- Cone Crushers
- Vibrating Screens
- Dewatering Screen
- Spiral Washers
- Bucket Washers
- Wobbler Feeder

Bucket Washer

KY-100 Bucket Washer

FABO Bucket Washers are used to purify 03-05-07 mm material obtained from stream beds from its dusty and muddy structure. **The bucket washers** produced by FABO serve our customers with their easy maintenance feature, minimum area coverage and superior washing ability. The carrying pocket covered with durable steel wires carries the material between 03-07 mm and transfers it to the bucket section. The main element in separating the foreign materials in the product is the carrying pockets.

General Features and Advantages:

- With its robust body structure, it offers service for long usage.
- With its 4 kW motor and 2,5 rpm, it performs the washing process in the most ideal time.

MODEL	KY-100
TYPE	Bucket Washer
DIMENSION	3150x600 mm
CAPACITY	60-120 TPH
MOTOR POWER	4 kW
WATER CONSUMPTION	140-160 m ³
